Dear Dr. Sharan

Warm greetings from DATRI!

This refers to our meeting at your office this noon on the above.

DATRI was founded in 2009 with a vision to find a willing, genetically matched donor for patients of Indian origin suffering from fatal blood disorders.

For many suffering from fatal blood diseases like blood cancer (Leukemia, Lymphoma etc) and Thalassemia, a blood stem cell transplant is the last hope of survival. Such patients need a donor with a matching genetic type. Only 1 in 10,000 to 1 in 2-Million Indians find a genetic match. With such low probability, it is necessary to have a large database of willing blood stem cell donors.

1. DATRI is the largest registry with over **134,600** people registered as potential blood stem cell donors. Please view this 3-min presentation for a complete understanding of what we do.

<https://www.facebook.com/datrworld/videos/vb.306333179465286.795184487246817.2?type=2&theater>

2. Thousands of patients suffering from life-threatening blood disorders are waiting for a blood stem cell donor. You or someone you know could be a match.

We conduct donor recruitment drives in Corporates and Colleges. A large part of our database consists of students recruited from Anna University, IIT Madras, Azim Premji University, India SB, Bits Pilani, Mysore Medical College, Oxford Institutions, New Horizon College of Engineering, Garden City College, MIT, IIM Bangalore, IIM Udaipur, NIT Suratkal, SRM University and many more across the country.

A socially aware and responsible University like yours would contribute to many potential and voluntary donors who could be the only chance of survival for a patient out there. We are eager on conducting a drive in your University to talk about blood stem cell donation.

We look forward to a final confirmation on the donor drive dates at your reputed Institution soon.

The Gift of Life is the most treasured gift of all. You too can Gift A Life.

Regards,

Srinivas | Donor Drive Coordinator | DATRI Blood Stem Cell Donors Registry
